Candidate: Sample Person
Test: Verify - Deductive Reasoning (2013) UKE
Norm Group: Verify DR General Population

| 0 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |

E   D   C   B   A

Candidate Percentile: 72

A - Well above average (91st percentile and above)
B - Above average (71st – 90th percentiles)
C - Average (31st – 70th percentiles)
D - Below average (11th – 30th percentiles)
E - Well below average (10th percentile and below)

The bar above shows overall performance on the Verify Deductive Reasoning Assessment in comparison to Verify DR General Population who have previously completed the test.

Percentile: 72

Technical Information

About cognitive ability tests

Cognitive ability (numerical, verbal and other forms of critical reasoning ability) is the most effective, single predictor of future performance in many different jobs. However, many other factors also play an important role in predicting job performance.

About the deductive reasoning test

This verbal mental ability test measures the ability to draw conclusions from a set of statements that are known to be true.

The score indicates potential for success in positions that typically require clear and accurate thinking, problem identification and evaluation of information and the ability draw accurate conclusions based on that information.

If this test was unsupervised, there is a small possibility that this score does not represent the individual's actual level of ability. The final decision on how to confirm and use the person's test result should follow internal policies and guidelines. Companies should evaluate the risks involved, corporate policy/governance, the use of other screening and selection tools, time, cost and other factors. All of these may be important when deciding the most appropriate method to verify an individual's Ability Test result.

Skills and Abilities Assessed by the Verify Deductive Reasoning Test

Verify assesses your skills in deductive reasoning relevant to problem solving and decision making. This includes the ability to:

- Evaluate arguments
- Analyse scenarios
- Draw logical conclusions

Your performance on the Verify Deductive is given in relation to that of Verify DR General Population who have previously completed the test. This was deemed to be the most relevant comparison group and should be considered when reviewing your results below.

Score Interpretation

Your score was better than or equal to 72% of Verify DR General Population. Compared with others in the specified group you are likely to demonstrate above average range of perception and high level clear thinking necessary to draw accurate conclusions from given data. This may be apparent in:

- analysing basic information and drawing accurate conclusions
- evaluating the strength of basic arguments
- accurately analyse basic scenarios
